DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 6-8, 10-17, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi (JP 2-118252).

Hayashi discloses an electric actuator (24), a force imparting member (16) engaged with a lever arm (20), a pulley (10) engagable with a belt (17), the force imparting member is axially movable by the electric actuator (abstract), a load sensor (22) coaxially engaged with the force imparting member (see Fig 1), the controller using the load signal to control a force imparting member position (abstract).

Allowable Subject Matter

3. Claims 23 and 24-30 are allowed.
4. Claims 2, 4, 5, 9, 18, 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
